DSPCon Achieves ISO 9001:2000 Certification

Bridgewater, NJ, April 18, 2007 --- DSPCon, Inc., a leading, global supplier of high-performance, dynamic data acquisition, analysis, archiving and recording solutions for high-value military, aerospace and rotating machinery applications, has achieved ISO 9001:2000 certification. The audit was conducted by EQA, an independent leader in ISO certification processes and services.

A globally recognized quality management standard developed by the International Organization for Standardization (ISO), ISO 9001:2000 applies to organizations that design, develop, manufacture, install and service products. To achieve certification, companies must have a comprehensive quality management system that addresses all areas of its operation.

“This recognition communicates to our customers, worldwide, that they are working with an organization that prides itself in incorporating the very best practices and processes in the industry to consistently meet or exceed their needs,” said Al Brower, president and chief executive officer at DSPCon. “Customer satisfaction has always been a keystone of our corporate values and our highest priority. Achieving ISO 9001:2000 certification is further evidence of the unwavering commitment DSPCon has in providing customers with products and services that they can have complete confidence in when performing mission-critical signal processing applications, today and in the future. “

DSPCon’s quality assurance manager, Dave Potpinka added, “Our long-standing commitment to total quality improvement principles has been woven into the corporate fabric of DSPCon since our beginnings. Obtaining certification is a glowing validation of our dedication to continuous improvement in everything we do and assuring the highest quality products and services in the industry.”

About DSPCon:
New Jersey-based DSPCon is a full-service solution provider of high-bandwidth, high- performance data acquisition, analysis and archiving systems for governmental agencies and commercial enterprises in the military, defense, aerospace, avionics, machinery, manufacturing and telecommunications industries. Certified to ISO9001:2000 quality standards, DSPCon solutions empower organizations to streamline test and development cycles and improve operational and production efficiencies by slashing the time between data acquisition and processed analytical results.

Today, DSPCon products and services support a wide variety of mission-critical signal processing applications including acoustic, vibration, shock and rotating machinery analysis; sonar and radar processing; digital data recording and jet engine testing. With hundreds of deployed solutions and over a decade and a half of experience in digital signal processing, systems integration and software development, DSPCon continues to be at the forefront in meeting the unique data acquisition needs of world-class organizations such as Pratt & Whitney, Honeywell and General Dynamics.
