## Leading Companies Continue to Turn to DSPCon for High-Performance Data Acquisition Systems and Recorders

*- Recent Client Wins Include Orders from World-Class Aerospace, Military and Defense Clients -*

**Bridgewater, NJ, March 15, 2007** --- DSPCon, Inc., a leading, global supplier of high-performance, dynamic data acquisition, analysis and archiving systems and services for high-value military, aerospace and rotating machinery applications, today announced several recent sales wins, with significant growth in the aerospace and defense industries.

The Company closed 2006 with the addition of a number of new customers as well as expanded deployments by established customers including General Dynamics, Northrop Grumman and Boeing. The increased sales have been driven by continued strong demand for the Company's high-performance data acquisition solutions and airborne recorders to support mission-critical test and measurement initiatives of partners and customers within the aerospace, avionics, rotating machinery and defense industries. Additionally, the Company has received significant equipment orders and consulting agreements from a number of industry-leading resellers.

"The growing list of blue chip companies now relying on our performance-proven data acquisition, analysis and archiving solutions speaks volumes about our ability to consistently develop and deploy high-quality solutions that exceed customer expectations," said Al Brower, president and chief executive officer at DSPCon. "We look forward to continuing to deliver unparalleled benefits to our enterprise users deploying data acquisition and recorder solutions across our targeted vertical market segments."

**About DSPCon:**

New Jersey-based DSPCon is a full-service solution provider of high-bandwidth, high-performance data acquisition, analysis and archiving systems for governmental agencies and commercial enterprises in the military, defense, aerospace, avionics, machinery, manufacturing and telecommunications industries. Certified to ISO9001:2000 quality standards, DSPCon solutions empower organizations to streamline test and development cycles and improve operational and production efficiencies by slashing the time between data acquisition and processed analytical results.

Today, DSPCon products and services support a wide variety of mission-critical signal processing applications including acoustic, vibration, shock and rotating machinery analysis; sonar and radar processing; digital data recording and jet engine testing. With hundreds of deployed solutions and over a decade and a half of experience in digital signal processing, systems integration and software development, DSPCon continues to be at the forefront in meeting the unique data acquisition needs of world-class organizations such as Pratt & Whitney, Honeywell and General Dynamics.
